Partnership Proposal

Indoor Navigation & Visitor Engagement for Your Exhibition

PILOT PARTNERSHIP · FIRST EXHIBITION FREE OF COST

Mapster is an indoor wayfinding and visitor engagement platform built for large venues like exhibitions, expos and trade shows, where finding the right stall, hall or facility is often the single biggest visitor frustration.

Turn by turn

Indoor directions to every stall and hall

Treasure hunt

Gamified footfall for every booth

Live dashboard

Real visitor and booth analytics

PREPARED FOR	**Your Exhibition**

WHO WE ARE

One app that guides every visitor

Mapster is an indoor navigation and exhibition engagement platform: a single, installable web app that guides visitors turn by turn to any stall, hall or facility, while giving organizers real visibility into how their venue is actually being explored.

We built Mapster to solve a problem every large exhibition faces. Visitors spend more time searching for stalls than engaging with them, exhibitors in less obvious corners get overlooked, and organizers have no real data on visitor movement to show sponsors or plan the next event around.

indoor wayfinding to every stall and hall	treasure hunt drives footfall to every booth	admin dashboard for visitor and booth analytics

Ready today, not a concept

Mapster is a fully built, working platform already, not a pitch for something we still need to create. We are ready to bring it to your exhibition right away.

THE CHALLENGE

What exhibitions struggle with today

1 Visitors get lost

Large venues with dozens or hundreds of stalls overwhelm visitors, with no digital way to search for a name, category or hall and be guided there.

2 Low booth engagement

Exhibitors away from the main entrance or a busy walkway are never found by a large share of visitors, which hurts their ROI and your renewals.

3 No visitor insight

Organizers rarely know which halls, stalls or categories visitors actually explored, data that matters to sponsors and to planning your next event.

4 One way information

Printed maps and static signage cannot be updated live for a schedule change, a moved stall or a time sensitive announcement.

WHAT YOU GET

What Mapster brings to your venue

One installable web app, with no app store download required, covering the whole visitor journey, plus a dashboard that gives you the visibility to run the event with confidence.

Real time indoor navigation

Turn by turn walking directions to any stall, hall, washroom or facility, accurate indoors where GPS alone fails.

Searchable exhibition map

A live, categorized directory of every exhibitor and stall. Visitors search by name or category and get routed instantly.

Treasure hunt and gamification

Points, streaks and a leaderboard reward visitors for actually visiting stalls, turning footfall into a game that benefits every exhibitor, not just the ones near the entrance.

Announcements and guidebook

Push notifications and an in app guidebook keep visitors current on schedule changes, offers and event info in real time.

Multi language support

The app already speaks 7 Indian languages, so language is never a barrier to visitors finding their way.

Admin dashboard and analytics

Your team gets a live view of visitor activity, stall verifications and engagement, real data you can bring back to sponsors and exhibitors.

HOW A VISITOR USES IT

STEP 1

Scan a QR code

At any entry point. Nothing to install.

STEP 2

Search and follow

Find any stall or hall and get walking directions.

STEP 3

Play and explore

Join the treasure hunt and earn points at every stall.

WHY WE'RE REACHING OUT NOW

Your first exhibition, completely free

FREE

We build, deploy and support everything

Mapster is looking for its very first pilot exhibition partner. For your upcoming exhibition we will build, deploy and support the complete Mapster experience entirely free of cost.

- No license fee
- No setup fee
- No cost to your team
- No long term commitment

What we ask in return

Simply the opportunity to prove real value at your event, and to use it as our flagship case study.

And after the pilot?

Any further changes, customizations or new features for your event or future editions will be taken up exactly as per your requirements. We grow the platform around what you actually need.

HOW WE'LL WORK TOGETHER

A simple, low effort rollout we handle the technical work end to end

1

Kickoff call

A short call to understand your venue, halls and exhibitor list.

2

Digital map setup

We build the indoor map and load your exhibitor and stall data, with no work needed from your team.

3

Walkthrough and testing

We test the live app with your team on site or over a call before it goes to visitors.

4

Go live

QR codes and signage at entry points get visitors straight into the app. Nothing to install.

5

Live support

Our team stays reachable through the exhibition itself.

6

Post event report

A summary of visitor activity and engagement data from your event.

GETTING STARTED

What we'll need from your team

Just four things, and we take care of the rest.

- Your venue's floor plan or hall layout
- A list of exhibitors with their stall or booth numbers
- Your event branding assets (logo, colors) for a co branded experience
- One point of contact from your team for coordination

Let's talk

We'd love to walk you through a live demo and finalize the details for your upcoming exhibition. Completely free, with nothing to lose.

mapster.officials@gmail.com mapster.co.in

WHAT HAPPENS NEXT

From hello to go live

STEP 1

A quick call

We walk you through a live demo and answer your questions.

STEP 2

Share the basics

Send the four items above and we start building your map.

STEP 3

Test, then go live

We test it with your team, then visitors scan a QR code and go.

Thank you for considering Mapster

We're excited about the possibility of being part of your event.
