STARTUP INTRODUCTION: WHO WE ARE AND WHAT WE ARE BUILDING.

MAPSTER | ARCHITECTURAL BLUEPRINT | FOUNDATION

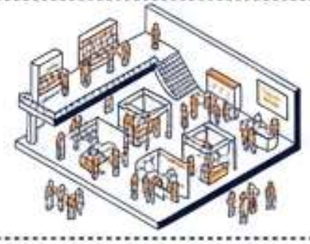

ALREADY LIVE

Web app live at **mapster.co.in**.

EXPO-READY BUILD

A multi-floor exhibition hall is already mapped and tested — stall categories, sponsor branding, footfall reward points, live today.

PROPRIETARY TECH

MAPSTER-MDO multi-destination routing, sub-second paths.

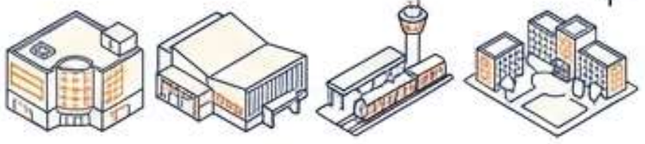

ZERO-FRICTION ACCESS

Scan QR → tiny map packet → no GPS/internet needed.

BUILT FOR SCALE

Malls, expos, metros, airports, campuses.

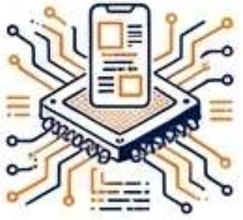

FOUNDING TEAM

RUDRAKSH SINGH BHADAURIA

FOUNDER

Built Mapster end-to-end: website, routing core, mobile architecture, offline map packets.

PROBLEM STATEMENT: INDOOR NAVIGATION IS BROKEN IN THE SPACES WHERE IT MATTERS MOST.

GPS LIMITATIONS

GPS doesn't work reliably indoors; large campuses, malls, metros and airports become navigation dead zones.

CONFUSION IN LARGE EVENTS

Auto expos, exhibitions, and freshers' events lose huge productivity to lost visitors and constant "where is X?" questions.

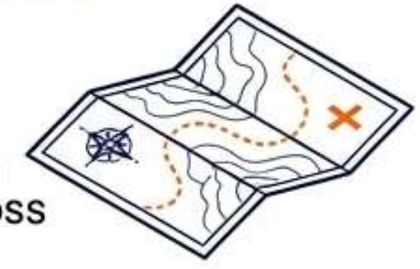

PRODUCTIVITY LOSS

Students, employees and visitors spend real time wandering — missed sessions, missed footfall, missed opportunities.

OUTDATED STATIC MAPS

Painted boards, paper handouts and isolated bespoke apps can't update in real time and don't scale across campuses.

MAPSTER

SOLUTION, PRODUCT & USP:
INSTANT INDOOR ROUTING + A LIVE ENGAGEMENT LAYER.

MAPSTER-MDO ROUTING

Proprietary multi-destination algorithm. Sub-second shortest path through complex indoor graphs.

QR + OFF-LINE MODE

Scan one QR poster. Tiny map packet downloads. Works without internet, GPS, or external sensors.

ENGAGEMENT LAYER

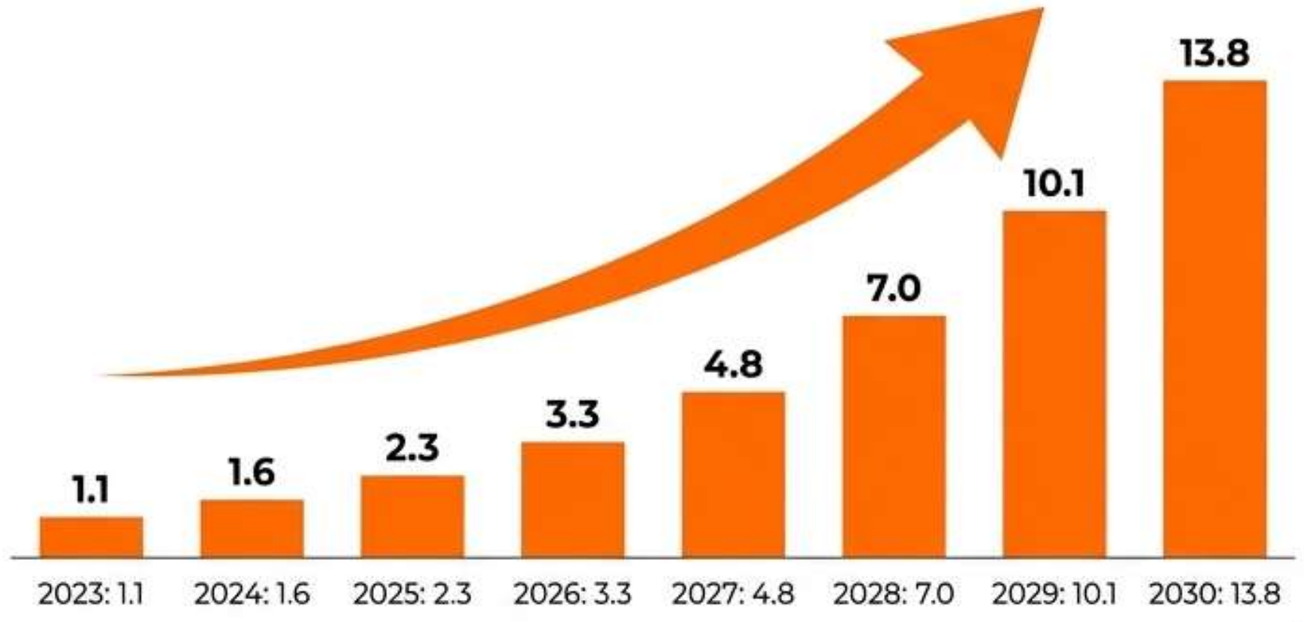

Friend chat, location sharing, exploration missions, rewards, admin moderation.

MARKET OPPORTUNITY: A rapidly growing global market with a wide-open India context.

Global Indoor Positioning Market (USD Billion)

$10.9B (2023) → $43B+ (2030) | CAGR ~44.9%

Source: Grand View Research, MarketsandMarkets.

The Indoor Navigation Gap is Real

- People still ask for directions in malls, hospitals, airports.
- GPS does not work reliably indoors.
- Huge gap between user need and available technology.
- Aligned with Viksit Bharat @2047 smart-infrastructure push.

COLLEGES | MALLS | AUTO EXPOS | METRO STATIONS | RAILWAY STATIONS | AIRPORTS

MAPSTER

LET'S SEE IT LIVE

- Scan a QR for an instant route, no app/GPS required.
- Guided heads-up walkthrough of the venue map.
- Live points generated on stall check-in (demonstrating footfall incentive for exhibitors).
- Available instantly in 7 languages for international attendees.

THANK YOU.

Mapster — Indoor navigation, reimagined.
Built for every exhibition on the map.
